

WORRIED ABOUT YOUR CHILD'S DEVELOPMENT?

## Your Child is unique

Your journey.  
Our support.

Every child learns and grows at their own pace, but it's natural to have questions about your child's development, especially if they seem to be meeting milestones differently than others.

Here are some common concerns parents have:

- How do I know if my child needs extra support?
- What should I look for in my child's behavior?
- Who can guide me through this process?

At Blossom Nursery, we offer a holistic approach to inclusion, ensuring every child receives the personalized attention and care they need to thrive.

# How We Support?

## WE WORK AS ONE TEAM

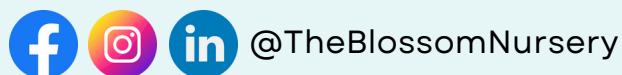

- **Early Detection & Support:** We prioritize early detection of developmental needs, with a sensitive and gradual approach. If we see areas where your child could benefit from additional support, we'll discuss it with you openly after careful observation.
- **Open Communication:** We offer workshops and coffee mornings to help you recognize early signs of developmental needs and guide you on next steps.
- **Dedicated Inclusion Specialists:** Each Blossom Nursery has a Special Educational Needs Coordinator (SENCO) who works with teachers to create Individual Education Plans (IEPs) for every child.
- **Early Intervention Partnerships:** We collaborate with experienced therapists to provide specialized support, both inside and outside the nursery.
- **Tailored Learning Environment:** We use Makaton for enhanced communication, visual aids and social stories for routine navigation, and adaptive seating to ensure comfort for all learners.
- **Continuous Team Development:** Our team undergoes regular training in inclusive education practices.

### CELEBRATING DIVERSITY & CREATING AWARENESS

We believe in fostering a community that celebrates diversity. We encourage you to share your inspiring stories, as they can provide valuable insights for other parents.
